INSTRUCTIONS

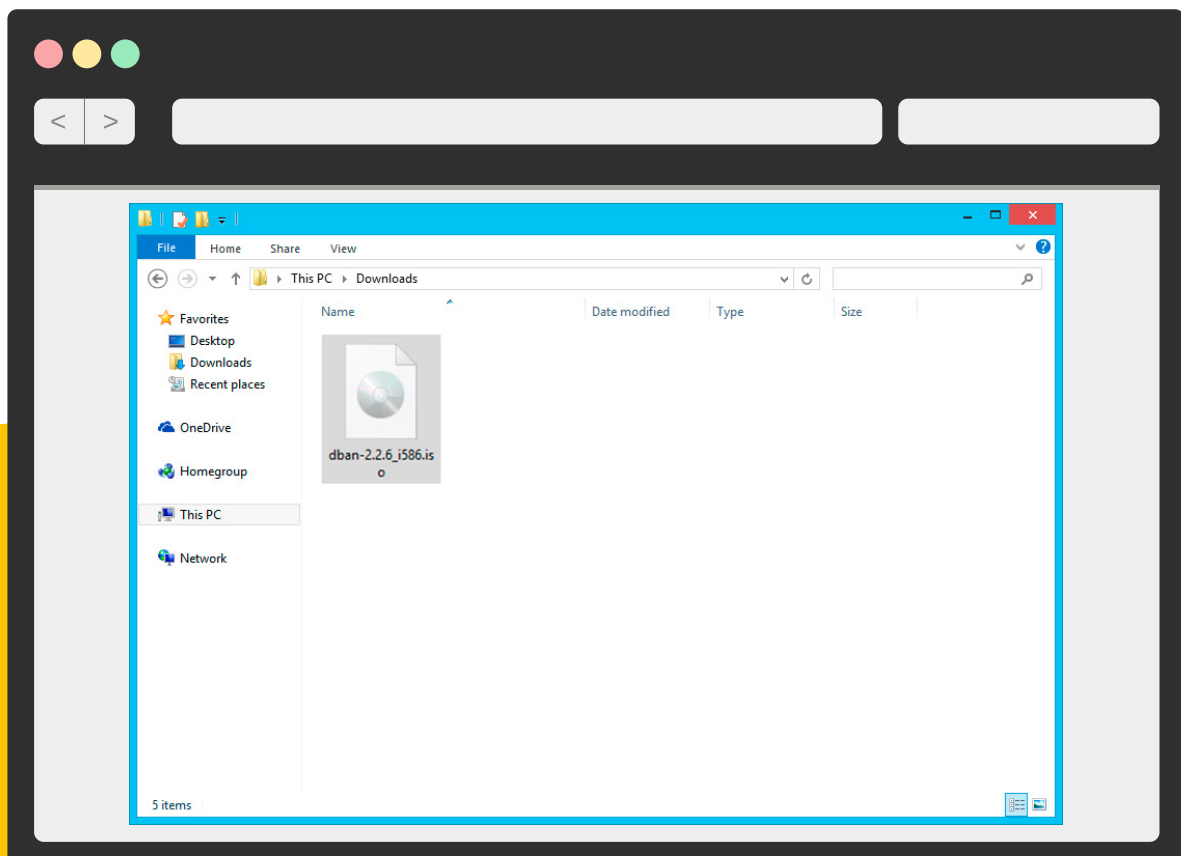

HOW TO BURN YOUR
SOFTWARE ON A CD/DVD

1.

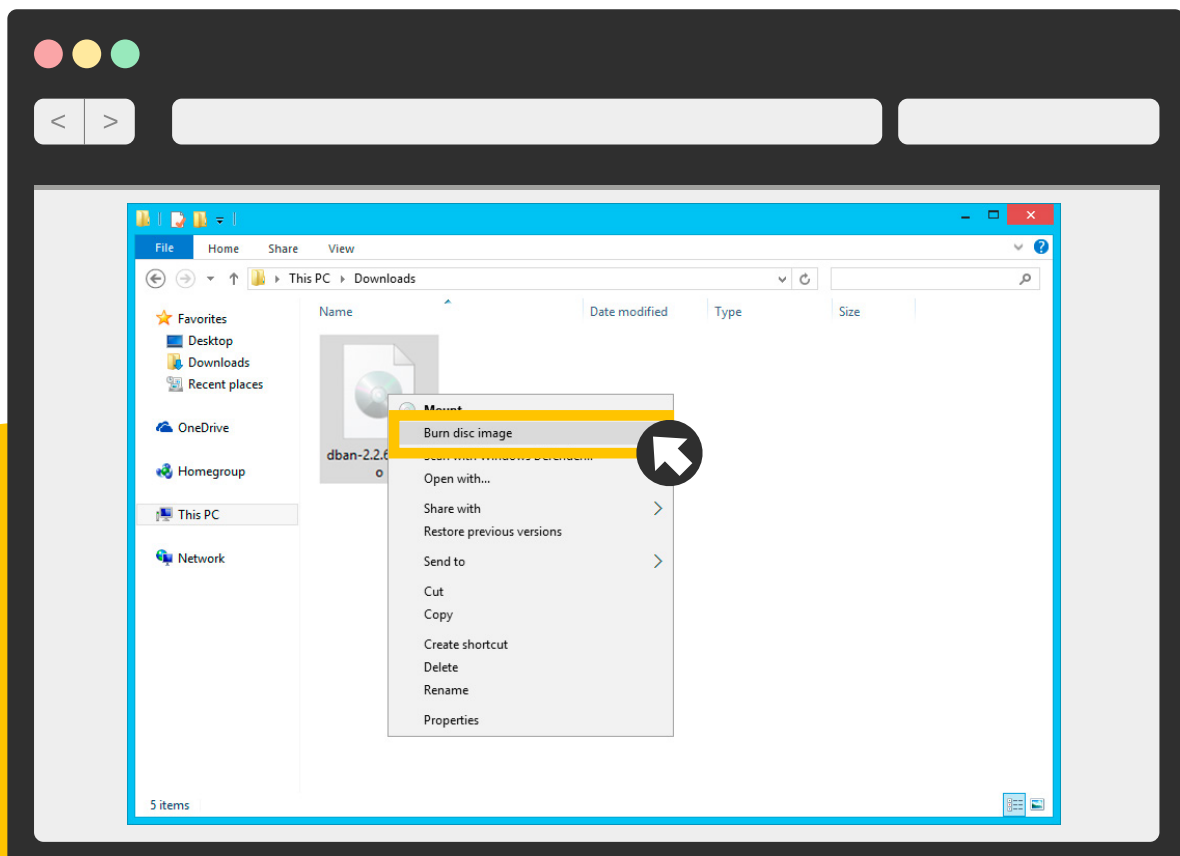

At first download your software (this has the ISO or IMG file format), if you have not already done so. Now, insert a disc (CD or DVD) in your disc burner drive.

2.

Click on the downloaded software with the right mouse button. A context menu opens up and you select **“Burn disc image”**.

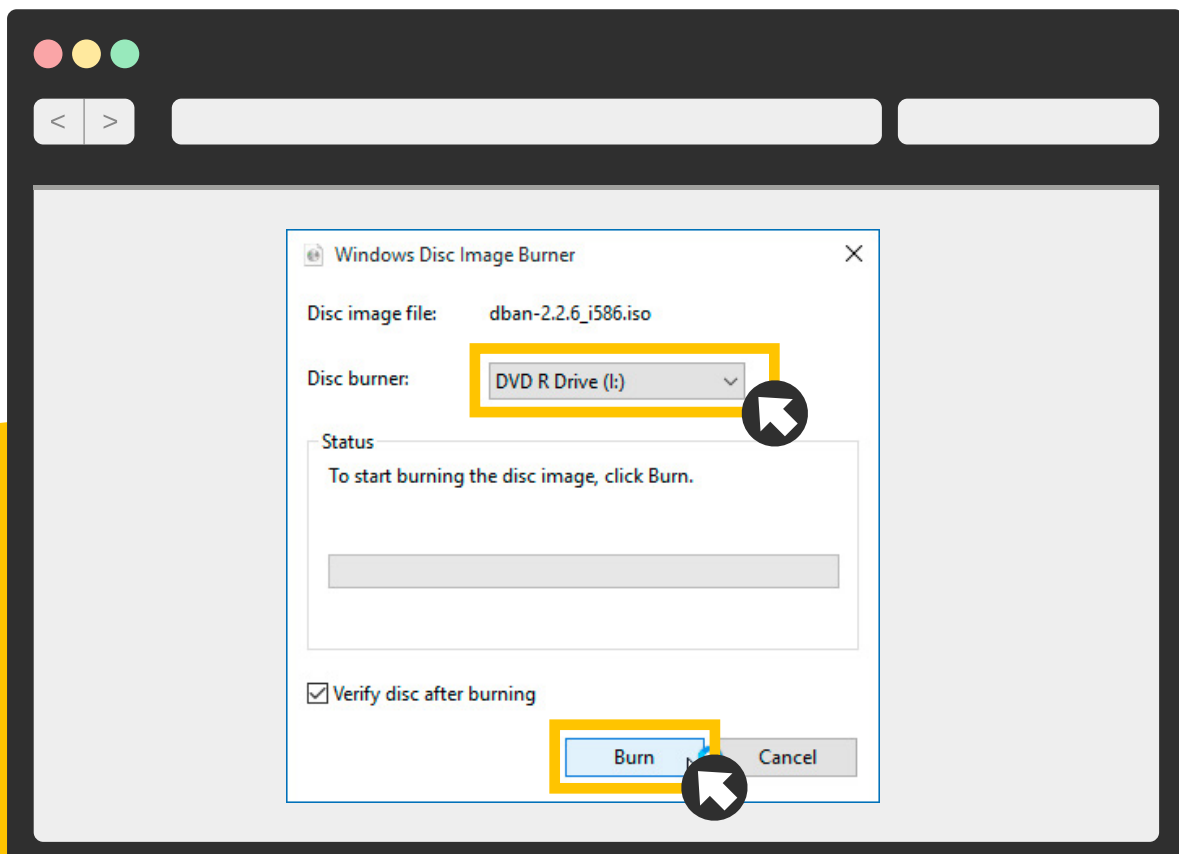

3.

In the window that appears select the drive with the disk and then click on **“Burn”**.

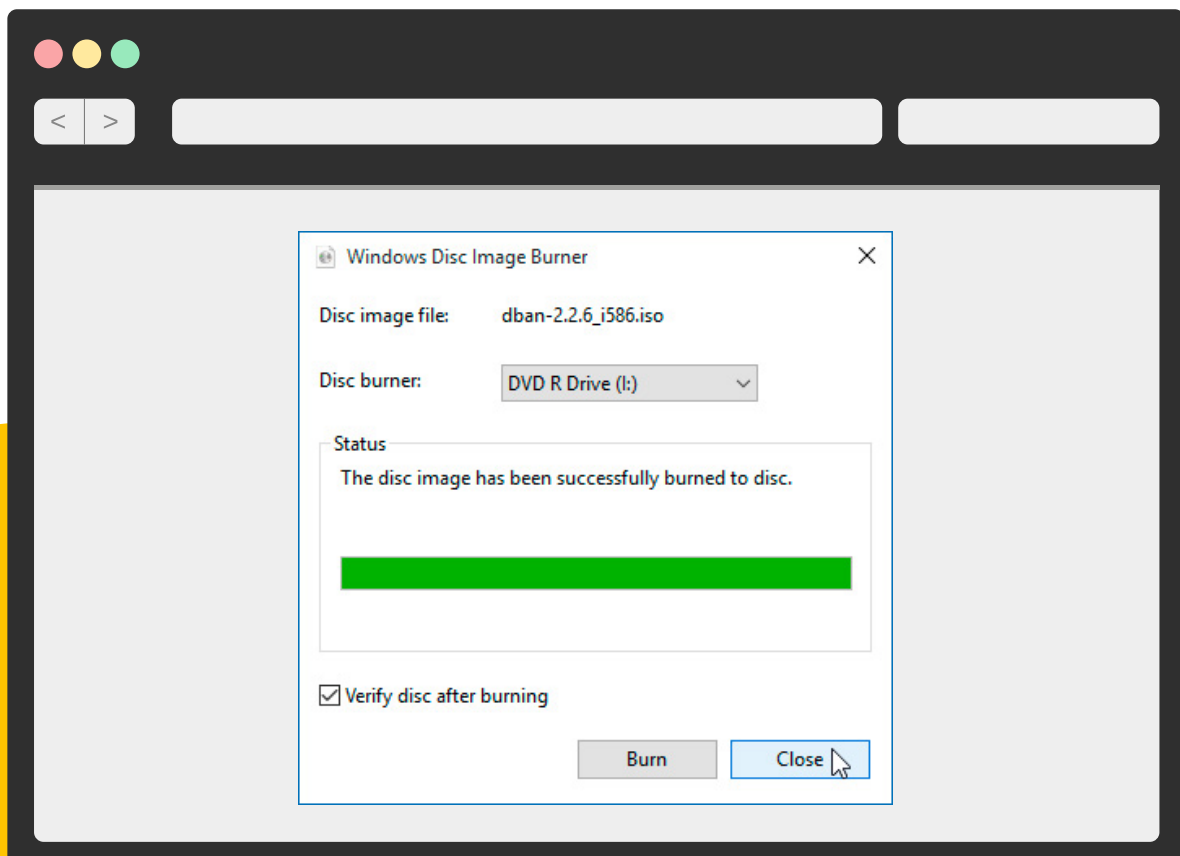

Moreover can you position the hook on **“Verify disk after burning”**. Windows checks then precisely after burning, all the data on the CD or DVD what makes the burning process last longer

4.

The burning process starts and after completion, the CD/DVD will be ejected automatically by your PC. The .ISO file is now on the optical disk and is ready for use.

Ready!
